

Realize Value Throughout Your Enterprise

Optimas Solutions is a tech-enabled manufacturer/distributor of fasteners and inventory management services that help global producers elevate efficiencies and reduce costs.

Using deep expertise and forward-looking processes, we minimize supply chain risk, optimize inventory, enhance operations and improve product quality for industrial manufacturers.

Our integrated portfolio of services includes sourcing, inventory management, engineering, cold form parts manufacturing and quality services to drive out hidden production costs.

Minimize Supply Chain Risk

With 4,000+ onshore, regional and global relationships—plus in-house manufacturing in the US and UK—Optimas reduces the risk associated with sourcing engineered and standard fasteners and C-Class components. Our AI-enabled demand planning software supports smart forecasts, order cycles and part availability.

Manufacturing at Optimas

Centrally located in Wood Dale, IL (near Chicago), Optimas Manufacturing is a fully aligned, in-house resource to support part engineering, production and quality lab needs.

With Optimas, customers have direct access to advanced manufacturing tools and cold forming talent for greater control of complex part development.

Integrated teams, in the same facility, foster a better understanding of part requirements. This reduces lead time, lowers design and production costs and offers supply chain assurance during normal and high-demand periods.

Tech-Enabled Inventory Management

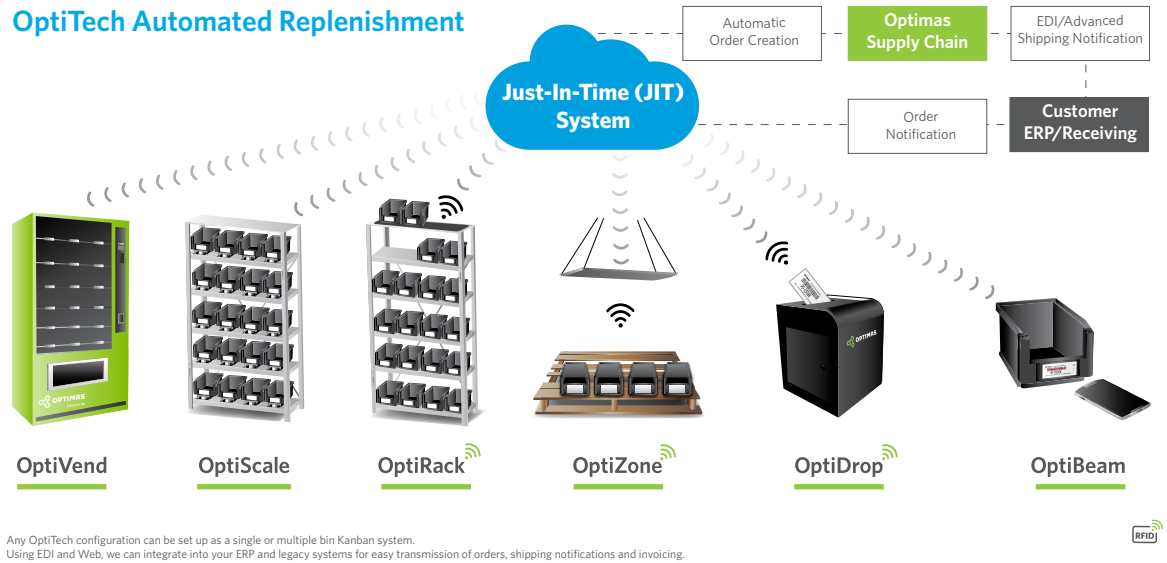

Delivery Programs

1
DOCK TO DOCK
Stock is delivered to a single location.

2
DOCK TO SUPERMARKET
Stock is delivered to a designated area(s) close to the point of use.

3
DOCK TO LINE
Stock is delivered to the point of use.

OptiTech Automated Replenishment

Optimize Inventory

A suite of three delivery models and six secure, tech-enabled inventory management solutions automate parts acquisition, distribution and replenishment. This reduces costs, creates greater forecast accuracy and elevates productivity.

Enhance Operations

Proven experts uncover manufacturing inefficiencies and propose/implement solutions that increase productivity, lower costs and drive continuous improvement. Services include Gemba walks, Advanced Product Quality Planning (APQP) and rapid prototyping.

Improve Quality

With IATF and ISO certs, a zero-defect culture and manufacturer awards, Optimas is recognized for standardized global best practices such as Quality Core Tools and Lean Six Sigma to meet manufacturing and product performance goals. Services include Failure Mode & Effects Analysis (FMEA), state-of-the-art lab for component quality inspection and measurement and a quick PPAP process.

ABOUT OPTIMAS

Optimas is the leading global industrial distributor and service provider specializing in fastening and supply chain solutions for manufacturers seeking to improve efficiency and profitability. We take care of the details so you can focus on manufacturing cutting-edge products—giving you an unparalleled competitive edge.
